DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly disclose a timing control method for operating a synchronous memory having local data bus, amplification bus, and global data bus comprising the steps of: providing a synchronous timing such that following operations are carried out in a $(n+1)^{\text{th}}$ clock cycle of the synchronous timing; reading and decoding the $(a+1)^{\text{th}}$ address; pre-charging the local data bus that stores the a^{th} batch of local data into an initial value in a local data bus pre-charging period; amplifying and transferring the a^{th} batch of global data from the signal amplification bus to the global data bus in a global data transmission period; transferring the $(a+1)^{\text{th}}$ batch of local data to the local data bus in a non-local data bus pre-charging period; pre-charging the signal amplification bus and the global data bus that stores the a^{th} batch of global data into an initial value in a signal amplification bus pre-charging period after temporarily storing the a^{th} batch of global data to a register; and transferring the $(a+1)^{\text{th}}$ batch of local data from the local data bus to the signal amplification bus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
